An investigative committee at the University of Colorado Denver recently reported multiple findings of data falsification and fabrication or lack of underlying supporting data regarding Figures 1, 2, 3, 5, 6, 7, 8, and 9, and Supplemental Figures 6 and 8 in this publication. Due to the numerous manipulations and lack of data to support the published findings, the *JCI* is retracting this article.

## Corrigendum

### Ablation of PI3K blocks BCR-ABL leukemogenesis in mice, and a dual PI3K/mTOR inhibitor prevents expansion of human BCR-ABL<sup>+</sup> leukemia cells

The authors recently became aware that Figure 7B was not assembled correctly. An incorrect image was included for the  $\beta$ -actin blot. In addition, the blots for 4EBP-1, p-AKT, and total AKT were stretched in the original figure. The authors were able to provide original source data for this figure panel. The correct figure panel, generated from the original source data, is below.

The authors regret the errors.
